

DRIVERS LICENSE STATE AND LICENSE STATUS ENTRY FOR ACCURATE QUOTING

Hillco General Agency will accept the following forms or drivers license or ID for all rated drivers. This guide is intended to show agents the proper selections in the quote process to make sure accurate quotes are obtained.

Acceptable Operators

- Valid Texas Drivers License
- Out of State License
- Texas ID Only
- Texas Drivers Permit
- Foreign or International License
- Foreign ID: Matricula or Passport
- No Identification (**Acceptable With Surcharge**)

Below we will identify the proper selection for license state and license status for each of the above categories. Following these procedures will ensure that risks are quoted accurately.

Below is a snapshot of the License section on the Drivers screen.

A screenshot of a software interface showing the "License" section. It contains three fields: "License State *" with a dropdown menu showing "TEXAS", "License Number" with an empty text input field, and "License Status *" with a dropdown menu showing "Texas License".

SELECTING THE PROPER LICENSE STATE:

All Drivers that have Valid Texas Drivers License, Texas Identification Card or a Texas Drivers Permit should have the License state of TEXAS selected.

A close-up screenshot of the "License State *" dropdown menu. The dropdown is open, and "TEXAS" is selected and displayed in the center of the menu.

All Drivers that have a Foreign or International License or Foreign ID like a Matricula or Passport should select INTERNATIONAL as the License State.

A close-up screenshot of the "License State *" dropdown menu. The dropdown is open, and "INTERNATIONAL" is selected and displayed in the center of the menu.

All Drivers that have and Out of State License should select the state or territory which has issued them a valid drivers license.

License State *

All Drivers that have **NO IDENTIFICATION** should have the license state of NO LICENSE selected.

License State *

SELECTING THE PROPER LICENSE STATUS:

Below each category is the correct selection for that operator type
